

IBA In-House Style Guide

This guide outlines the IBA house style and should be followed for all IBA material, print, film (where relevant) and online. The style guide contains general guidelines for grammar and spelling conventions as well as a list of specialised terms that are specific to our field.

Comments and feedback are welcome, as are additions to the Glossary and Specialist Terms.

If you are writing for an external publication, its own house style should be followed where one is given. If, however, you are presenting material in an IBA publication that has already been published elsewhere, it should be copy-edited to conform to the IBA house style.

Please note: updates to the style guide are highlighted in blue. Please check the date at the top of each page to ensure you have the current style guide.

Abbreviations

As a rule of thumb, abbreviations are given with open punctuation (no stops), as in: Mr, Ms, Dr, eg, ie, *ibid*, et al, etc

Please note – job titles eg, ‘Ambassador (ret.) Hans Corell do not follow this rule and include a stop.

Common abbreviations, such as ‘eg’ and ‘ie’, should only be used when within parenthesis or when part of a footnote/reference, with no stops. In the main body of text, ‘for example’ and ‘that is’ should be written out in full. Whether written in full or abbreviated, ‘for example’ (‘eg’) and ‘that is’ (‘ie’), are always followed by a comma.

Legal abbreviations for publications can be found here: www.legalabbrevs.cardiff.ac.uk.

Acronyms

Use these **carefully and consistently**. The acronym should be given once in parenthesis, with no inverted commas, after the first use of the full title, and then the acronym used alone thereafter.

International Criminal Tribunal for the former Yugoslavia (ICTY)
Middle East and North Africa (MENA)

Where an acronym is commonly but not universally known – for example, EU, UK, UN, US – write out the full version and the abbreviated version thereafter (ie, there is no need to use parenthesis/brackets after the first mention to define the term).

Inverted commas are only necessary for terms of reference that are not acronyms:

The International Criminal Court (the ‘Court’) has stated that...

Avoid using a common acronym for something else lesser-known, such as CLE – commonly used for ‘continuing legal education’ and therefore shouldn’t be used for ‘clinical legal education’.

Note that a term is not necessarily written in title case simply because it has an acronym:

non-governmental organisations (NGOs) NOT Non-Governmental Organisations

See also the [IBA glossary of specialist terms](#), including many acronyms for definitions and full versions.

Law firms

We do **not** add acronyms after law firm names (eg, LLP, SC) in editorial material.

Note: in IBA conference brochures and some advertising LLP is used. Check with the appropriate IBA department if unsure.

Addresses

See also [Numbers](#), and [URLs](#) and [Email Addresses](#).

There are two ways of laying out the full address. The address can be laid out on the page in a formal way, as in letters or publicity materials, or given in normal usage as part of a paragraph.

For example, the IBA postal address laid out formally is:

International Bar Association
4th Floor, 10 St Bride Street
London EC4A 4AD,
United Kingdom
Tel: +44 (0)20 7842 0090
Fax: +44 (0)20 7842 0091
Website: www.ibanet.org
Email: info@int-bar.org

The text form is like this:

International Bar Association, 4th Floor, 10 St Bride Street, London EC4A 4AD, United Kingdom
Tel: +44 (0)20 7842 0090 Fax: +44 (0)20 7842 0091 Email: info@int-bar.org Website: www.ibanet.org

Apostrophes

An apostrophe must **not** be used with possessive pronouns hers, ours, yours, its:

The IBA and **its** committees...
Information about **its** services...

Use **'s** for the possessive case and **s'** for the plural possessive:

An IBA **member's** request...
The IBA **members'** meeting...

No apostrophe in plurals, including numbers, dates and uppercase:

committees, services, 1990s, NGOs

Use apostrophes in **contractions**, where the apostrophe indicates something missing, similar to the following:

don't, I've, she's, he's, it's

Bibliographies

Bibliographies follow the style set out in *The Oxford Standard for Citation of Legal Authorities* (OSCOLA), www.law.ox.ac.uk/published/OSCOLA_4th_edn.pdf (see pages 11–12). OSCOLA is a clear, comprehensive guide to citing legal journals, books and cases in notes and references.

Bibliography lists

Author name (surname first then initials) | name of publication | (publisher year)

Fisher E, *Risk Regulation and Administrative Constitutionalism* (Hart Publishing 2007)

Endnotes and footnotes

Author name | name of publication | (publisher year)

¹⁵ Elizabeth Fisher, *Risk Regulation and Administrative Constitutionalism* (Hart Publishing 2007).

Alternatively see the [IBA Concise Guide to Endnotes and Footnotes – Taken from OSCOLA](#)

Capitalisation

It is preferable that capital letters are used sparingly:

Where the reference is specific to an office, organisation or body, a capital letter should be used. If the reference is general or non-specific, the lower case letter should be used. Our preference is for a capital letter to be used in all references to that specific organisation, body etc thereafter.

IBA officer titles, IBA committees and all official job titles should be capitalised no matter where or how they appear.

The **Litigation Committee** would like to thank the **Chair** for all his hard work in making the Committee the success it is.

The **11th Annual Competition Conference** was held in **New York**. The **Conference** was exceptional.

The **Dodd-Frank Act** was signed into federal law in 2010. The **Act**...

The **Court of Appeal** agreed that this was the case. The accused argued with the **Court**, stating that, in **courts** in his native country, this was not the case.

Example person is **Head** of xx Department. (Only capitalise 'head' if it's an official title).

Non-IBA officer titles and positions should be used **carefully**. The specificity rule applies:

John Smith is a **content editor** at the IBA...

John Smith, **Content Editor**, manages...

Avoid using ‘partner’ as a descriptive for someone at a law firm; ‘partner’ does not tell you enough about their role within the firm so do not capitalise. **Do not capitalise barrister, lawyer, judge, unless this is part of their formal title** (see also [Honorifics and titles](#) and the [Glossary](#))

a senior partner at Slaughter and May
the Attorney-General
Law Society President
UK Prime Minister
The inauguration of the Venezuelan President
The Prime Minister stated that...

When presenting a list of names (eg, an advisory group), for the sake of consistency **capitalise** titles throughout the list.

Government – only uppercase when referring in the first instance to a government’s official name. Thereinafter it should be **lowercase** unless specified in parenthesis (the ‘Government’) for repeated reference. See [Capitalisation](#) and [Abbreviations](#).

A representative from the Federal Government of Nigeria stated that government-intervention was... / A government minister said...

The Government of the United Kingdom of Great Britain and Northern Ireland or British Government

The Government of the French Republic (the ‘Government’) is headed by the Prime Minister. The Government is comprised of...

The US government is composed of three distinct branches. Other governments are...

Captions

A caption (in Roman, with no terminal full stop) is included with photographs.

People in photographs are identified from left to right in the form: Name, (job title and/or affiliation).

If permission has been obtained, mention of this should be included in the caption.

Upon its completion, the Shanghai Tower (left) will be the tallest building

Reproduced by kind permission of Todd Maisal, *New York Daily News*

Diagrams are not usually accompanied by captions, unless a caption is necessary to explain the diagram fully, in which case the style would be the same as for photographs (Roman, no full stop). Diagrams should be titled.

Clichés

Avoid any use of clichés where possible. Some common examples:

he has **got** – the got is not necessary and shouldn’t be used

Read between the lines

only time will tell

just a matter of time

against all odds

going/moving forward – use ‘in the future’

Colons and Semicolons

Colons

Whereas the semicolon links equal or balanced clauses, the colon points forward, from introduction to main theme, from cause to effect. It fulfils the same function as words such as **namely, that is, for example.**

Finally, a piece of advice: if you are an individual businessperson or administrator of a company... The question arises: why are broadband services increasing in importance?

The colon is regularly used to introduce a list of examples, such as a series of items, which are often separated by semicolons.

Two different options were considered as means to render cast and crew services: direct engagement; or engagement through a personal service or loan-out company.

Semicolons

The semicolon separates two or more independent clauses that are of similarly equal importance and are linked as a pair or series. In such instances you should be able to replace the semicolon with a full stop and retain the meaning and grammatical sense of both sentences.

Some years ago lawyers were not aware of how effective mediation can be; today, most are but we await a new regulation to give the process yet more credibility.

Commas

Commas are used to separate several items in a series. As a general rule in a list, use commas instead of semi-colons unless each item is longer than three words. Do not use a comma before the ‘and’ before the final item in the list:

We should further emphasise that, according to arbitration entities, the major disputes submitted for resolution arise from franchising, consumer relations and corporate issues.

Commas may be used to separate two independent clauses before a conjunction:

The majority of responses to the Green Paper appeared to favour some form of action by the EC, but many respondents counselled against...

Commas may be used to set off introductory elements:

It was a fascinating all-day session comprising four panels, which explored...
Overall, Auckland proved to be a most interesting Conference.

Commas are used to set off elements that could be in parentheses (see also [Parentheses](#) and [Hyphenation](#)):

Charles Lawton is chief legal adviser to the mining giant Rio Tinto, which is involved in two class actions brought under the ATS.

Charles Lawton, Chief Legal Adviser to the mining giant Rio Tinto, is currently...

Courts

Refer to names of courts **in full** in the first instance. Thereafter, an abbreviation and/or acronym may be used.

the International Criminal Court (ICC or the 'Court'), the European Court of Human Rights (ECtHR)

If more than one court is referred to in the article/report etc, make sure that the courts are clearly distinguishable to the reader. Remember that it is safer to use an acronym than referring to specific courts as the 'Court'.

Ellipses

Ellipses should appear in square brackets when removing text from a quote (have a space either [...] side) **excluding when used in pull quotes**

'... law firms have lagged behind [...] they don't recognise they are part and parcel of the equation...'

Email Addresses

Email addresses should be lowercase throughout and in Roman typeface in print and online.

editor@int-bar.org

Emphasis

See [Italics, bold and underlining](#).

Emphasis Added

Use **square/hard** brackets when including text that is:

- not part of the original quote;
- to denote a grammatical mistake in the original quote using sic [*sic*]; or
- when the author ‘added their *own* emphasis’ [emphasis author’s own].

Foreign Words and Phrases

In the text, **italicise** foreign words and phrases unless the word is a proper noun (eg, a name of an organisation). Provide a translation immediately afterwards in brackets, or in a footnote if required.

Where an organisation or legislation has its own domestic name, write the English name, then include the domestic name and abbreviation in single brackets. As above, do not italicise the foreign word/phrase if it is a proper noun.

German Civil Code (Bürgerliches Gesetzbuch or BGB).

Country and city names

Use the English version of country and city names.

The Hague, **not** Den Haag

See also [Italics, bold and underlining](#).

Figures and Tables

Where figures and/or tables are used, distinguish between figures and tables, and number them 1, 2, 3 etc (labelling them at the bottom of the image). In the main text, refer to them as (see Figure 1), in round brackets, in non-italicised text. Avoid referring to page numbers or ‘above/below’ as the positions of the tables can easily change at final proof stage. See also [Captions](#).

Figure 1: **petroleum** revenue reporting schedule, **not** Figure 1 - Petroleum revenue...

Geography

As the official names of places around the world change, the general rule is to keep up with these changes. The names of cities in India are a notable example; eg, Bangalore to Bengaluru. See further examples in the glossary.

IBA Global Insight

The language used in *Global Insight* should be more informal than that used in the journals, which is academic in tone. For example, contractions can be used.

For interview features, the speaker's name should be written in full, no brackets, then use initials thereafter.

James Lewis:

Sitao Xu:

JL:

SX:

IBA Committee Updates

IBA Committee Updates should be consistent across all committees.

- No photographs of authors to be included alongside articles.
- Table of contents does not include author names.
- 'From the Chair' and 'From the Editor', rather than 'Message from the Chair' etc.
- Authors to keep endnotes to a minimum.
- 'Meet the Officer' pages, if included, should ask appropriate questions. Be wary of self-advertising.
- Sign off on e-bulletins should appear as:

Name

Role, committee

Email address

- Author details in online articles should appear as:

Name

Firm, city

Email address

IBA Conference Programmes

Conference title wording:

- Marketing to send initial wording for webpage to Content for comment before the initial conference blurb goes online
- Titles should not include the word 'IBA'
- Sub-headings should have a maximum of six words and start on the line beneath the heading in a smaller point font
- There should be no repetition between the heading and sub-heading

Conference titles, front page:

- Heading A - Frutiger bold (65) 32 point
- Heading B - Frutiger bold (65) 20 point
- The colour of Heading A should be the same as the 'IBA conferences' branding down the left-hand edge
- Heading B should be in black

Other front-page style pointers:

- Sessions include (if they are the session titles), otherwise Topics include. The 'will' in 'sessions will include' is superfluous.
- The Twitter logo/handle/hashtags should be directly below the IBA logo on the top right hand side
- The dates should appear on a line above the address to tidy things up
- Wherever a person appears more than once in a conference programme, the person's firm details are to appear on all occasions

Back cover:

- IBA/committee blurb should always be on the back cover

The following Style exceptions apply to all conference programmes:

- Ordinals for conference title headings written as numbers – 1st, 2nd etc because of limited width space.
- For bulleted lists of session outlines, each bullet should be in sentence case with no end stop or semi-colon.
- United States (USA after first mention, not US).

IBA Annual Conference Programme:

- See bulleted list point on pg 23.
- For the US, Canada and Australia, the State/Territory/Province is always reflected.
- The event is called the IBA Annual Conference (not annual conference, not IBA 2017 etc).
- Time formats in all IBA publications should be listed as 1330 (not 13:30, 13.30, 1pm etc)

Heading Levels and Titles

Follow this guide and you shouldn't go far wrong.

<i>Proofing mark</i>	General incl conference programmes and ad hoc reports	Journals	Committee Updates, magazines, online	IBAHRI reports	LPRU reports	<i>Font style</i>
A head	Title/ Conference Title	Title of Article	Title of article	Title of Chapter	Title of Chapter	65 Bold, title case, 16pt
C head	Heading level 1	Heading level 1	Heading level 1	5.1 Heading level 1	Heading level 1	65 Bold, sentence case, 12pt (IBAHRI can be numbered)
<i>D head</i>	<i>Heading level 2</i>	<i>Heading level 2</i>	<i>Heading level 2</i>	<i>Heading level 2</i>	<i>Heading level 2</i>	<i>56 Roman Italics, sentence case, 12pt</i>
E HEAD	HEADING LEVEL 3	HEADING LEVEL 3	HEADING LEVEL 3	HEADING LEVEL 3	HEADING LEVEL 3	55 ROMAN SMALL CAPS, SENTENCE CASE, 11PT

<i>G head</i>	<i>Heading level 5</i>	<i>Heading level 5</i>	<i>Heading level 5</i>	<i>Heading level 5</i>	<i>Heading level 5</i>	<i>56 Italic, sentence case, 10 pt</i>

Honorifics, Names and Titles

General

Honorifics are words that convey respect when used in addressing or referring to a person. Some honorifics are **formal titles**. Generally, what matters is **consistency**.

- If you are using honorifics, make sure you use them for everyone – this includes the accused.
- Be consistent in your naming of individuals: choose one name for the individual and stick to it throughout the text.
- Make sure your choices let the reader easily identify the person you are referring to. If you are referring to several judges in the text, and you don't clearly indicate which one you are referring to, that is, by calling them both 'the Judge', it can be frustrating and confusing for readers.
- When listing names in alphabetical order by surname, double-barrelled surnames should be listed under the first part of the surname.

Common honorifics: Mr/Mrs/Miss/Ms

Do not use common honorifics. Names should appear [firstname] + [surname], and then [surname] only thereafter. Ensure consistency:

John Smith believes the ICC should investigate. 'The international legal community has not done enough about this,' adds **Smith**.

Academic and professional honorifics: Professor/Doctor

If the individual's profession or academic background has an obvious relevance to the material (such as in a biography, a press release on a particular issue, a panel event) these titles may be included.

These should follow the same rule of being written out in full [honorific/title] + [firstname] + [surname] in the first instance, and then [surname] only in subsequent mentions.

Note: that not everyone will provide their titles, and omission of one may inadvertently cause offence if they see that others are included.

Professor Cherif Bassiouni is an expert in international law and Egyptian affairs... As **Bassiouni** explains, 'It was very obvious that the Morsi regime was moving the country towards a "theocracy" ...'

Biographies can be a little more informal if appropriate: provided you ensure the first iteration gives their full title and qualifications you may shorten to [firstname] only.

Dr Mark Ellis is Executive Director of the IBA. **Mark's** particular responsibilities have included ...

Honorifics and formal titles

These indicate nobility or a formal title granted to a person by the state/head of state and should be included in first mention of the individual's name.

'QC' for English barristers should also be used in the first mention as it refers to 'Queen's Counsel', and is nominally bestowed upon them by the head of state.

Helena Kennedy QC is Director of the IBAHRI. **Helena's** particular responsibilities have included the establishment of a bar association in Afghanistan...

British human rights barrister **Michael Mansfield QC** believes the ICC should investigate... 'To me it is a rather obvious case whereby the rule of law has been bashed aside and the international community has done very little about it,' adds **Mansfield**.

Lord/Lady, Sir/Dame, Baron/Baroness

[Honorific/title] + [Full Name] on the first mention and then shorten to [honorific/title] + [Surname].

Baroness Helena Kennedy QC is Director of the IBAHRI. **Baroness Kennedy** is the IBAHRI's ...

Judges

ACADEMIC PUBLICATIONS: JOURNALS AND COMMITTEE UPDATES

Abbreviate according to established convention in the country/court in which that judge presides. For example, in the UK, refer to OSCOLA (see pages 19–20).

Smith LJ

JOURNALISTIC PUBLICATIONS: MAGAZINES AND WEB ARTICLES

Refer to the judge in full throughout.

Lady Justice Smith

ENDNOTES/FOOTNOTES

Should always use the abbreviated form.

President, Prime Minister

[Honorific/title] + [Full Name], then then shorten to either [Title] + [Surname] or [Surname] – remembering to keep your choice **identifiable and consistent**.

Prime Minister David Cameron received a warm greeting from German Chancellor Angela Merkel at the opening of the EU summit in Brussels. **Prime Minister Cameron** also shook hands with French President Nicolas Sarkozy.

Names

See naming practice document on the intranet for guide on foreign naming practices: [A Guide to Names and Naming Practices](#)

Arabic Names

Ensure consistency. See below examples of previously used spellings for reference:

Hashd al-Shaabi (Popular Mobilization Forces)

Mohammad-Javad Larijani

Mohamed Morsi

Abu Mahdi al-Muhandis

Saud al-Qahtani

Crown Prince Mohammed bin Salman (MBS)

Abdel Fattah al-Sisi

Qasem Soleimani

Al-Youm (Saudi newspaper)

Hyphenation

Do not use hyphens over line-breaks.

Hyphens help to avoid confusion, for example:

The state of the art museum – refers to the wellbeing of the art museum

The state-of-the-art museum – refers to a modern museum

You should hyphenate two words when they describe one item and both come before the item being described (do not use a hyphen if the describing words come after the item), for example:

These are the most up-to-date records

The records are up to date

Third-party services

The services provided by third parties

This happens on a large scale

The large-scale organisation of...

in-house counsel, law-making, inter-party, cross-border

Note any adverb that ends in ly is **not** followed by a hyphen:

an expertly organised conference

newly established

Note closed-up en-dashes are used to separate items of equal weight (often proper nouns):

public–private partnership

defendant–contractor

Note en-dashes/double dashes are used to enclose supplementary information, or replace isolating commas to create emphasis. En-dashes should be used with spaces either side.

Having some sort of collective settlement tool available – like in the Netherlands – will be...

See [Glossary](#) for common examples.

Italics, Bold and Underlining

Italics

Italics are used for:

- titles of books, newspapers, reports, proposal papers (in main text and endnotes/footnotes);
- titles of journals (in main text only);
- the names of parties in cases and judgments;
- heading 3 (see [Headings and titles](#));
- Latin phrases if specific to law or not well known (*per curiam* and *ex officio*); and
- *sparingly* for emphasis if required.

See [Glossary](#) for common examples and exceptions to the rules above.

Cases

Sermat Holdings SA v Nu Life Upholstery Repairs Ltd [1985] 2 EGLR 14.

Books

Tom Bingham, *The Rule of Law* (London: Penguin Press, 2010), 25.

Bold

Bold is used for titles and headings only.

Underline

Underlining should generally be avoided as it can be mistaken for web links in PDFs.

Latin Legal Terminology

Italicise all Latin legal terminology, unless it is used common parlance, such as:

ad hoc

alibi

bona fide

de facto

in situ

inter alia

prima facie

pro bono

pro rata

vice versa

per se

Law Firms

Check names of law firms carefully. Beware of the use of ampersand (&) instead of 'and'.

We do not include acronyms after a law firm name (eg, LLP, SC etc). **Note** in IBA conference brochures and some advertising LLP is used. Check with the appropriate IBA department if unsure.

Lists and Bullet Points

General

Lists of fewer than three items or points can be presented within the text with no line breaks. If the sentence or list is long and convoluted, you may wish to present it in the following way: with a colon to begin the list; semicolons to separate each item; and a conjunction to indicate the closing point.

Avoid using numerals for listing, unless the numbering contributes to the sense and meaning of the text (that is, it is chronological or hierarchical, or if it corresponds to subsequent numbered sections). If numbering is required, use numerals in parenthesis, with no stop.

The court treated it as having two elements: (1) whether the government 'controls' the entity in question; and (2) whether the entity 'performs a function the government treats as its own'.

Bulleted lists

Bulleted lists (using the round stop •) should be used for longer lists and are preferred to numbered lists – again, unless the numbering contributes to the sense and meaning of the text (that is, it is chronological or hierarchical, or if it corresponds to subsequent numbered sections). Bullets (and numbers) should be offset from the main body of text by one line, following a colon.

If the bullet point is a complete sentence, use sentence case and finish with a full stop.

Where the sentence runs over a line (such as listing in the example below), this should be allowed to wrap normally; punctuation should be normal within the sentence, each bulleted line ending with a semi-colon. The last point should end with a full stop.

A colon should precede a series of bullet points. Each bullet point should start with a lower case letter, with a semi-colon at the end of each point, like this:

Activities relevant to the workshop include:

- conflict of laws;
- dispute resolution; and
- competition issues.

Note that a bullet point should not run to more than a couple of sentences; if it does, it means that you're writing a short paragraph rather than a bullet point.

Sub-bullets, where needed, should be set out as below:

- main bullet;
 - sub bullet;
 - sub bullet;
- main bullet again.

This is also the case where one or more of the bullets end in a question mark, such as:

- you have a bullet point;
- that ends in a question mark?
- followed by another bullet point.

Exception: IBA specialist conference programmes and Annual Conference programme

For bulleted lists of session outlines, each bullet should be in sentence case with no end stop or semi-colon.

Conference topics include:

- What the banks should consider when lending in Central and Eastern Europe
- Litigating in Europe – is the system of enforcing judgments effective?
- Managing the modern European law firm

Numbered lists

When numbers are preferred to bullets, use figures not Roman numerals, with a stop afterwards, not parenthesis. See below:

1. like this;

(2) not like this.

If a second tier of numbering is required, it should be a Roman numeral in parenthesis:

1. like this;
 (i) this; and
 (ii) this.

Notes

See [Referencing: Endnotes, Footnotes and Citations](#).

Numbers

General

Spell out one to ten. Use figures from 11 upwards **unless** the sentence starts with a number.

For decimal fractions use figures for numbers below 11 (eg, 6.8). Avoid beginning a sentence with a decimal fraction.

There were **ten** points for the **19** members to consider.
Roughly **two** out of every **11** members live in Nigeria.
Almost **five** per cent of the firm run the marathon.
There was a **75** attendance rate at the meeting.
Twelve out of the **15** attendees were female.
Departure this year was up to **6.3** per cent for secretarial staff.

Use commas in numbers over 1,000, including currency; use un-spaced en-dashes to separate spans of numbers, for example, 45–46. If a number span begins at ten or below and spans above ten (ie, 10–15), use the figure, not spelt out.

When referring to large numbers (such as ‘three million people’), **write out in full**. However, when referring to million, billion and trillion in currency, abbreviate to ‘m’, ‘bn’ and ‘tn’, respectively, with no space between the number (eg, £4bn).

Switzerland, which has a population of approximately 7.5 million people, has frozen Gbagbo’s assets worth US\$81m.

Percentages

Use per cent **not** percent or %.

Exception: tables, lists or infographics

If there are long lists of percentages, or percentages are used graphically (that is, in a table or infographic) use %. This should only be relevant for magazines and online.

Attendance was high, at 70 per cent... only two per cent margin...

Ordinals

First, second, third – be consistent. If being used in this format, replace with conjunctions (eg, moreover, in addition) onwards from ‘third’.

Write out ordinals from one to ten; use numbers from 11 onwards.

Example:

It was the second anniversary, 11th person, 23rd letter

When using numbers, the ordinal indicator is **lowercase roman** and **not in superscript**.

Ordinal indicators are **not** used for dates.

Exception: IBA conferences

Always use numbers for ordinals. Example:

1st Biennial Conference, 15th Transnational Crime Conference

Fractions

Use the one to ten, followed by 11, 12, 13, rule.

A fifth of lawyers attending..., seven tenths of respondents..., they scored 11/50..., 13/100

Measurements – distances and weights

In full, using the one to ten, followed by 11, 12, 13 rule.

Ten kilometres

It was a distance of nine miles

15 grams

Dates

Dates are written in the form: 26 May 2005. Use un-spaced en-dashes to separate date spans within a single month and spaced en-dashes for date spans across several months.

26 May 2005
10–15 March
30 September – 5 October 2012

Time

Ordinals, 24-hour time, no punctuation. Globally understood and clear!

Coffee will be served at 0900...
You must be ready to leave at 2100...
midday, midnight...
1 hour 25 minutes
3 hours 1 minute

Parentheses

Parentheses are used to include text of lesser importance in a sentence, to enclose an acronym or definition, or to include a person's affiliation or location. If the material is important enough, use some other means of including it within your text (such as commas, dashes, or a separate sentence). Note that parentheses tend to de-emphasise text, whereas dashes tend to make material seem even more important.

The European Convention on Human Rights (the 'Convention')
The International Criminal Court (the ICC or the 'Court')

Primary and Secondary Sources in the Main Text

Journal, report, proposal paper titles etc

In full in italics, without quotation marks:

Journal of Energy & Natural Resources Law

Book titles

In full and italicise:

International Human Rights Law by Professor Javaid Rehman

If citing a **chapter with the book**: single quotes around chapter title, Roman font:

'The Value of Authorship in the Digital Environment' in *World Wide Research: Reshaping the Sciences and Humanities in the Century of Information*

Newspaper article titles

Roman in single quotation marks, names of newspapers are italicised:

‘Supreme Court Warns on Quality’ *Financial Times*

Interview titles

Include interviewee name, position and institution, and the location and date of the interview (due to the nature of IBAHRI’s work, these details are not always available).

Note for endnote/footnote referencing, see OSCOLA or the [IBA Concise Guide to Endnotes and Footnotes – Taken from OSCOLA](#)

Quotations

Quotations from other works, cases, statutes and so on must be faithful to the original (see [Emphasis added](#)).

Quotations in the body of the text should be enclosed within single quotation marks; quotations within quotations are given double quotation marks.

If a quotation exceeds **five** lines in length, it should instead be set out on a **new paragraph indented with one standard indent** and enclosed within single quotation marks.

Punctuation should be placed outside the quotation marks, unless it is part of the quotation itself. Quoted material should reflect exactly the source being quoted; it should not be put into house style (unless the quote was from a spoken source). It is the author’s responsibility to ensure that the quotation in the typescript does correspond exactly with the original source material.

‘There should be equality of representation on both sides of the contest – “equality of arms” [...] in order to maintain fairness.’

It should be noted that in Australia a ‘corporate dividend trap’ by the buyer is subject to restrictions.

Exception in **magazines**, the preferred style is to break up the quotation **using a comma on the inside of the quote**, rather than introduce it as a block of text:

‘It was highly unlikely,’ he said, ‘that this would ever actually occur.’

Magazine pull quotes

One double speech mark before the pull quote and no punctuation after, citation as follows:

“ *People with limited funds are not going to take the risk of paying £16,000 for a Bar exam*

Michael Todd QC
Former chairman, UK Bar Council

Note avoid using ellipses in pull quotes where possible.

Referencing: Endnotes, Footnotes and Citations

Journals

These are used to give citations or to add comments or cross-references and should follow the same style given in OSCOLA. They should use Arabic numerals (unless for author information, which should be given as the first footnote, using symbols *). All sources cited in the main text should be accompanied by a full footnote.

IBA style uses *The Oxford Standard for Citation of Legal Authorities* (OSCOLA). This is a clear, comprehensive guide to citing legal journals, books and cases in notes and references: www.law.ox.ac.uk/publications/oscola.php.

Alternatively see the [*IBA Concise Guide to Endnotes and Footnotes – Taken from OSCOLA*](#)

Notes in the text should be in superscript Arabic numbers, should ideally be at the end of a sentence, clause or idea, and must be given after all punctuation – except an en-dash.

It was clearly stated that ‘this is right’.¹
New legislation could come into force as early as September – according to officials¹ – and would mean...

Endnotes/footnotes should be in sentence case, finishing with a full stop. Use ‘see n 1 above’ rather than ‘*supra* note 1’.

¹ A more complete account of the law of gaming is given in chapter 2.

² For example, service outside the jurisdiction.

³ *Ibid.*

⁴ See n 1 above.

⁵ Hartley William Shawcross, *Life Sentence – The Memoirs of Hartley Shawcross* (London: Constable, 1995), 2–15.

Committee Updates, magazines and online

Footnotes in Committee Updates and magazines should be converted to endnotes. These should also follow OSCOLA and be formatted as outlined [above](#), and should be headed ‘**Notes**’.

IBAHRI reports

These are used to give citations or to add comments or cross-references and should follow the same style given in OSCOLA.

Slashes

Slashes should have no spaces before or after them:

Mediator/arbitrator

Spelling

Use **UK** spelling – avoid US spelling. Set your Word document to English (UK).

Exceptions

- Proper nouns, for example, World Health Organization; and
- quoted material – use the quote as it originally appears

British	American
aeroplane	airplane
benefitting	benefiting
categorise	categorize
Centre	center
combatting	combating
defence	defense
emphasise	emphasize
favour	favor
focusing	focussing
fulfil	fulfill
kilometre	kilometer
metre	meter
naivety	naïveté
neighbour	neighbor
organisation	organization
orientated	oriented
practise (verb) practice (noun)	practice (verb and noun)
speciality	Specialty
tonne	ton

Translated Material

Call **journals** by their native name, rather than a translation.

Foreign courts are proper nouns (eg, Bundesgerichtshof) so use Roman, not italic. Use the native name with the English in brackets the first time it is mentioned – Bundesgerichtshof (Federal Constitutional Court of Germany). Thereafter it is up to the author/editor, but the native name is preferred, as long as it is consistent.

Accents on foreign language words (eg, French, German, Portuguese and Spanish): accents should be used on all foreign words where available.

No accents are needed on uppercase letters, except in the case of names, eg. Martin Šolc.

Translations – if we are using unofficial translations, indicate this by an asterisked footnote saying *Publisher’s translation or *Author’s translation. If it is a published translation a reference to the publication is sufficient.

See also [Foreign words and phrases](#)

Website URLs

URLs are case sensitive; do not alter the case of URLs and always check they work/refer to the correct thing.

Main text

Roman typeface, bold, NO ANGLED BRACKETS (<>):

www.ibanet.org/Publications/publications_home.aspx

We do not use http:// **unless there is no www in the address**

https://uncitral.org/en-index.htm

We do not put a ‘/’ at the end of a URL and we do not underline URLs.

Endnotes/footnotes

Same as for main text, except **do not** make bold.

www.ibanet.org/Publications/publications_home.aspx

Note OSCOLA uses angled brackets (<>), however, IBA style *never* uses angled brackets in URLs.

Glossary and Specialist Terms
