 Multinational Companies Needs and Expectations

 Misconceptions and Pitfalls

 Typical Global Programme Structure

 Regulatory and Tax Issues

 Fireside Discussion

 Q&A

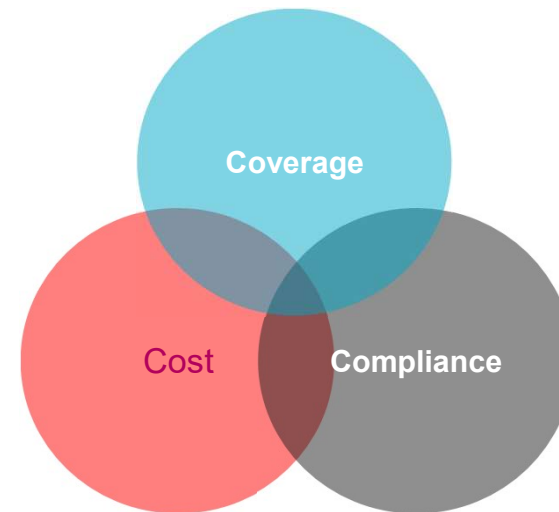

Agenda

Important Issues for Multinational Companies

The C6 Conundrum

The C3 Concept

GOAL: maximise the overlap of these competing factors

Global Insurance Programmes

Certain misconceptions cleared

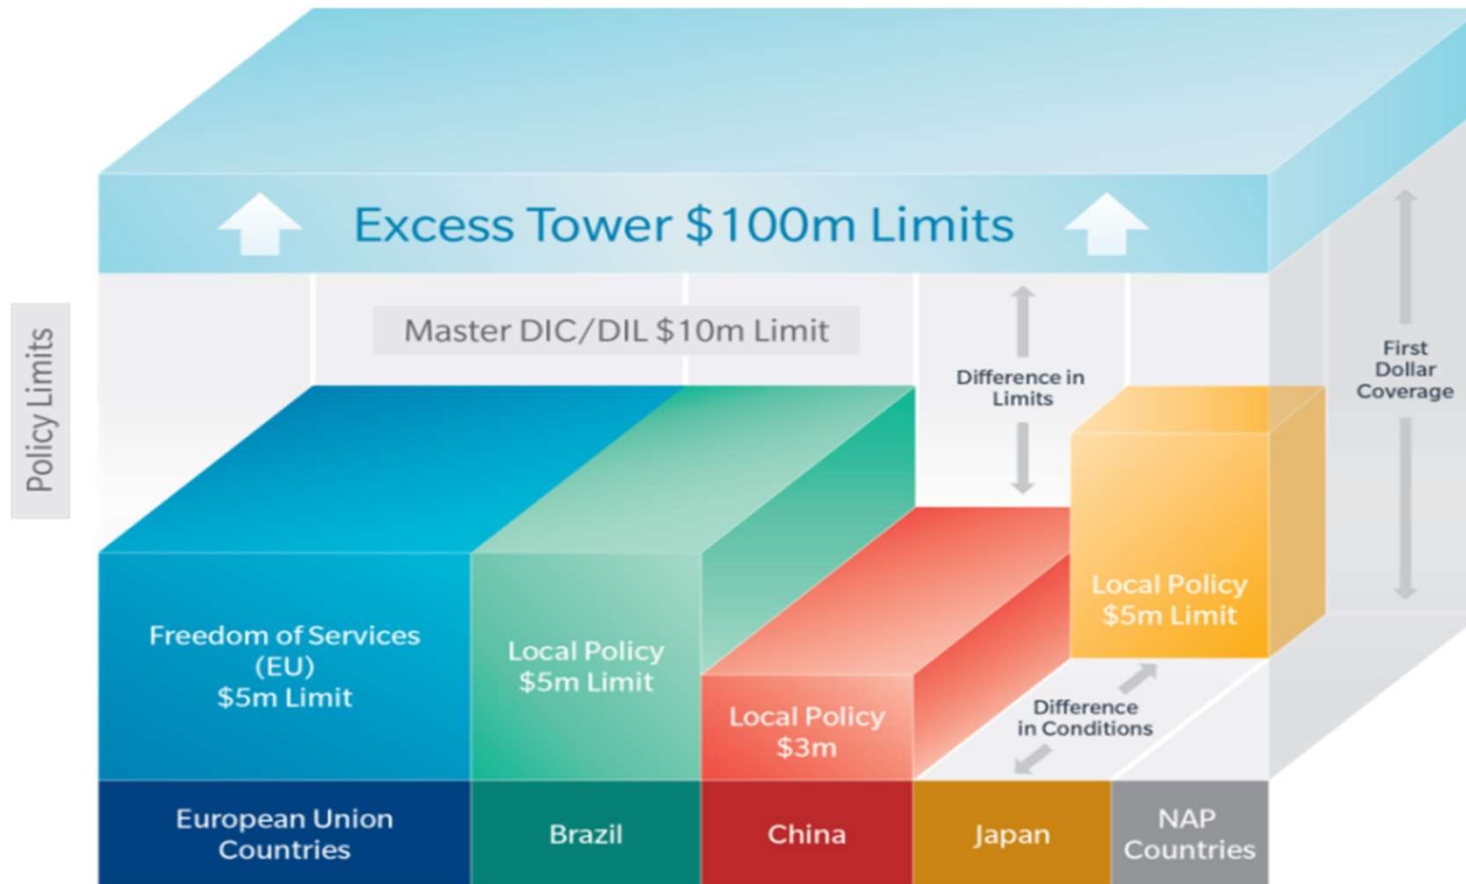

- If there is a local policy – the whole global programme is compliant.
- Global insurer is able to pay claims in every country.
- The insurer is always right as regards regulations and taxes.
- The broker or insurer is responsible for the remittance of premium taxes.
- Premium allocation is the responsibility of the insurer or the broker.
- Central payment of local policy premiums is much easier.
- Master and excess policy premiums can be recharged to all insured entities.
- Insurer/broker can invoice the insured entities for master/excess policy premiums.
- The Financial Interest Cover clause is confusing and untested.

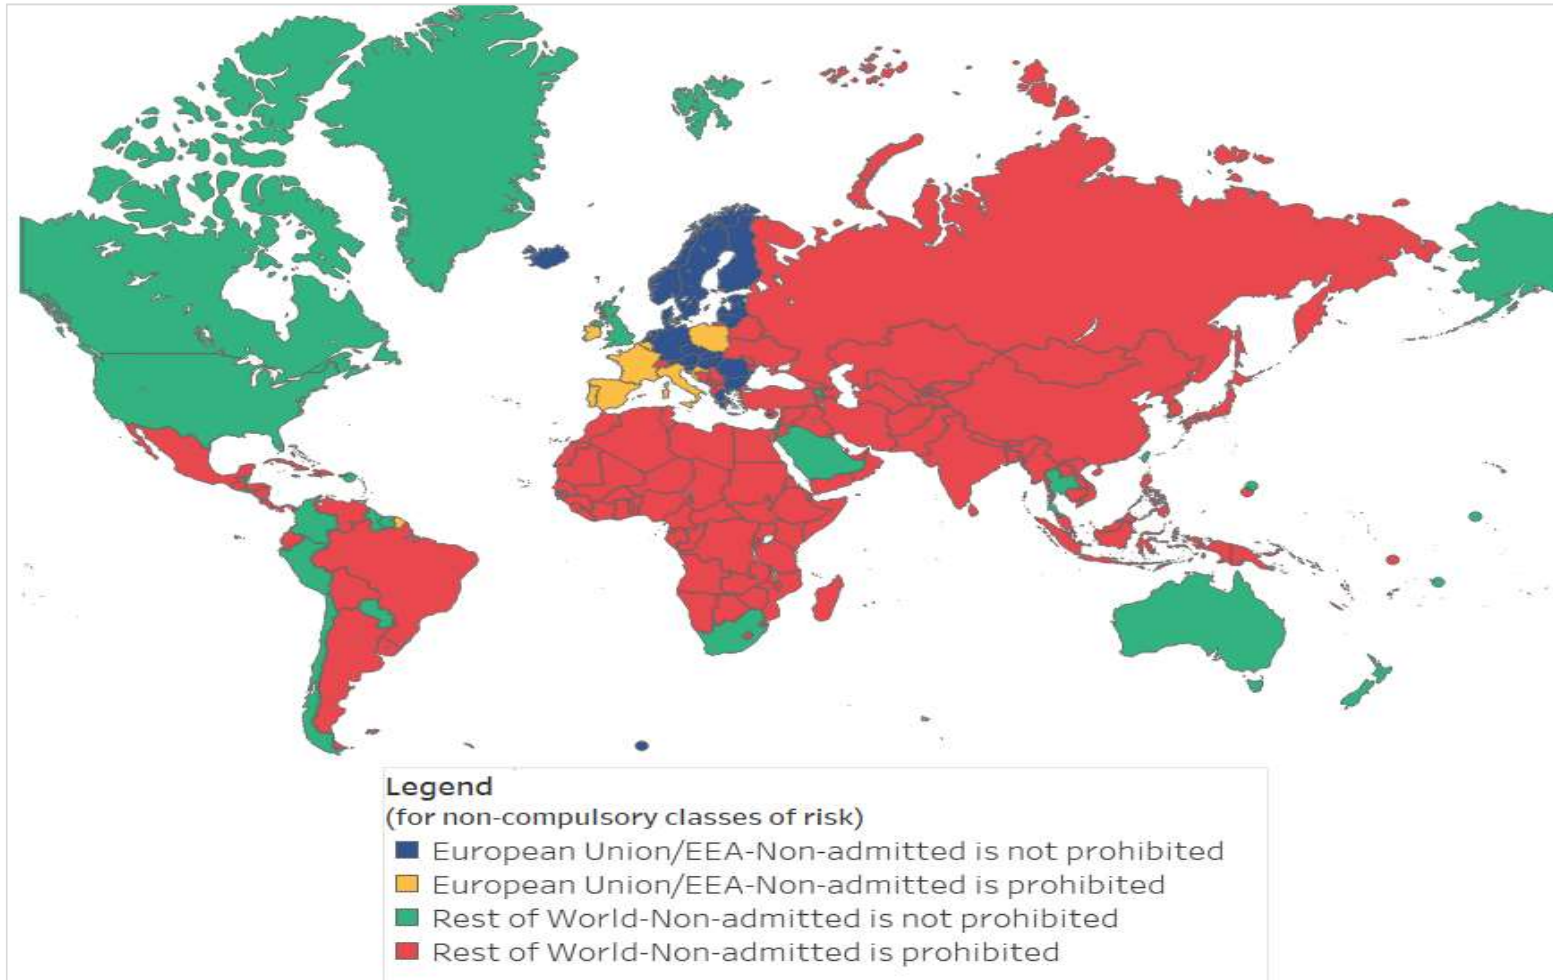

Pitfalls for Multinational Companies – “unbudgeted surprises”

1. Insurance terms (cover and limits) of local policies inadequate
 - **Gaps in coverage**: leading to company paying claims out of its own resources
2. No Director’s & Officer’s insurance policy in overseas countries
 - Unable to receive funding for **defence costs** and payments to third parties
3. Premium payment: Central vs Local
 - **Adverse cash flow** and foreign exchange, Transfer Pricing issues on cross border transactions
4. Premiums not allocated/recharged to insured entities of multinational group
 - **Tax deductibility** of expense foregone
5. Premium tax audits by tax authorities – Insurer and multinational group
 - **Unpaid premium taxes** plus interest plus penalties
6. Receipt of claim monies by parent company of multinational group
 - Corporate income tax cost, **double taxation risk**, corporate finance anomaly
7. Evidence of insurance to third parties
 - No local policy & the insurer not licenced, **contractual terms not fulfilled**
8. Insurer not willing/able to pay claims to the insured or to the third party
 - Leading to **claims being unpaid** or the company funding the loss out of its own resources

Typical Global Insurance Programme

Insurance Regulations Diverse and Inconsistent

Shifting Taxation Landscape

- **Technical developments**

- Kvaerner (2001) and A Ltd (2019) European Courts of Justice precedent: “Location of Risk”
- OECD Base Erosion and Profit Shifting (“BEPS”): impact on captive insurance companies

- **Tax authorities want their “pound of flesh”**

- Increasing number of insurance premium tax (IPT) audits being conducted – EU (Germany and Belgium in particular), US, Canada, Switzerland, Australian New Zealand
- German tax rules changed from 1 January 2021 – potential for double taxation
- UK tax authorities looking to bring in new regulations for payment of IPT on premiums paid to non-EU insurers

- **Tax rates and payment responsibilities**

- Whilst income tax rates reducing, premium tax rates are increasing (or new rates being introduced)
- In the UK and EU, the insurer must allocate premiums, collect and pay IPT thereon

- **South Africa, Chile, Peru, Australia, New Zealand, US, and Canada**

- Premium related taxes payable by **INSURED** directly to tax authorities on non-admitted insurance premiums paid to foreign insurers

- **Income/corporate tax implications**

- Premium deductibility may be denied in certain territories.
- Claims from insurers may be taxed – twice!

Increasing Premium Tax Landscape

Premium Tax Rates	2008	2023
Netherlands	7.5%	21%
Finland	22%	24%
Greece	10%	15%
Hungary	-	10%
India	12.36%	18%
Mexico	15%	16%
Ireland	2%	7%
South Africa	14%	15%
United Kingdom	5%/17.5%	12%/20%
Slovakia	-	8%
Gulf Cooperation Council	-	5%
Saudi Arabia	-	15%
Spain	6%	8%
Singapore	7%	8%
Yukon	2%/3%	4%

Manage Unbudgeted Surprises

Five Step Process

Points for Consideration

- 1 Understand your internal business model to ensure that the insurance programme is “fit for purpose”
- 2 Identify various risk retention and risk transfer options
Cost/Benefit of each option including claim payment protocols under various scenarios
- 3 Ensure that there is consistency in wording between local and master insurance policies
- 4 Premium Allocation Methodology – “just and reasonable, robust and defensible” and well documented
- 5 Identify all premium tax obligations in respect of all policies – local, master and excess layers

Let's Discuss

Q&A

Praveen Sharma, Managing Director

Global Leader – Insurance Regulatory & Tax Consulting Practice, Marsh Multinational
